Superior Pro-Gamer Mousepad for fast Moves

The RAPTOR-GAMING P3 has been developed especially with and for gamers. This mousepad enables efficient and precise work with the mouse without jerks or dropouts. In addition, the RAPTOR-GAMING P3 enhances targeted precision by its special surface structure. The bearing surface is significantly larger as compared to common high-sense mousepads and keeps the gaming mouse in touch even during hectic moves.

The RAPTOR-GAMING P3 is made of robust and scratch-resistant plastic material, offering an extremely easy-to-clean surface. The bottom side has been sprayed with a special rubber coating to avoid slipping even on very smooth surfaces. The RAPTOR-GAMING P3 comes with a comfortable bag for safe transport of the mousepad to the next LAN and also includes an extra set of RAPTOR-SLIDERS to improve the slippage of your mouse.

The RAPTOR-GAMING P3 is used by prominent eSports-Clans, like f.e. n!faculty or Meet your Makers (mYm).
