

RAPTOR-GAMING M3

Product

RAPTOR-GAMING M3 the new Hardcore-Gamers weapon, delivers even more options for individualisation.

The resolution of the new RAPTOR-GAMING M3 laser mouse can be adjusted in steps from 400 up to 2000 dpi. An OSD secures that the Gamer always knows which dpi level is activated. In addition the integrated LED on the topside of the mouse indicates the selected resolution. The dpi can also be changed by software with the completely new "RAPTOR-ADJUST"-Driver. This driver enables the Gamer to fine tune the dpi level in steps from 400 up to 2,400 dpi.

Another highlight of the RAPTOR-GAMING M3 is the individual customization of the weight of the mouse in 9 steps. (120 gr., 122,5 gr., 125 gr., 127,5 gr., 130 gr., 132,5 gr., 135 gr., 137,5 gr. and 140 gr.)

RAPTOR-GAMING M3

The innovative ergonomic right-hand design and the special soft-touch surface secures that Gamers hands will never slip off the mouse again. The elegant silk-black and silver mouse also includes two additional sets of mouse gliders and a flexible cable with a length of 2.5 m.

To complete the extensive feature set of this Hardcore-Gamers weapon, two additional neoprene-bags are included in the delivery content. One bag is specially designed for the secured transportation of the Mouse (RAPTOR-MOUSEBAG) to LAN-Parties. The second, smaller bag, is designed for the secured transportation of the 8 different weights (RAPTOR-WEIGHTBAG).
