Pro-Gamer 7.1 Premium USB-Surround-Headset

The RAPTOR-GAMING H1 is one of the first 7.1 USB-Surround-Headsets that can be disassembled completely and is especially suited for gamers. It consists of a fully-padded headset and an extendable microphone.

The RAPTOR-GAMING H1 was developed in close cooperation with successful professional gamers. The extremely light-weight and comfortable design with excellent stereo sound and full bass makes it especially suited for multiplayer gaming. This headset simply lets you hear faster!

The included 7.1 USB sound card is perfectly adapted to the RAPTOR-GAMING H1.

The headset is extremely light and offers utmost wearing comfort. The ears are completely enclosed by soft ear pads. The movable speaker cups adapt to any head shape. The extra-long cable of 4 m includes a compact mini control unit that allows for an infinite volume adjustment. The microphone can be completely sunk into or extended from the left speaker cup. In addition, it can be moved flexibly and individually into any direction to adapt it to your own needs. In order to provide clear and understandable commands at the next LAN, the microphone filters side-noises (Noise Cancelling). For a safe transport, the speaker cups can be detached from the head clip individually with one turn.
